Experienced Software Developer adept in bringing forth expertise in design, installation, testing and maintenance of software systems. Equipped with a diverse and promising skill-set. Proficient in various platforms and languages. Experienced with the latest cutting edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

EMPLOYMENT HISTORY

Sep 2022 — Present

Full Stack Developer, Habber-tec
Madrid

Back-end(Java & TypeScript):

- Developed a REST API that enabled integration with third-party services, resulting in a 75% increase in customer retention.
- Implemented an automated deployment process that reduced time-to-deployment from several days to several hours
- Implemented a secure authentication system that ensured user data was protected and met industry compliance standards
- Optimized code for performance and scalability, resulting in a 30% decrease in response time for end users

Front-end(Angular & JS ES6):

- Incorporated third-party APIs into the web application for data exchange and real-time updates
- Developed a modular, single-page web application in Angular that incorporated responsive design principles
- Developed a robust authentication system using JWT tokens and OAuthX for secure user access
- Created custom directives to manipulate DOM elements and extend the functionality of components
- Developed custom services to manage application state and communicate with back-end APIs

Apr 2019 — Jul 2019

Wordpress Developer, IES Hipatia Fuhem
Madrid

- Developed and maintained custom widgets to display dynamic content on websites, resulting in a X% increase in page views
- Developed custom shortcodes to enable users to generate complex content with minimal effort
- Developed and implemented a backup system that ensures data integrity and allows for quick recoveries in the event of an outage
- Developed and maintained custom APIs to integrate WordPress with third-party systems, automating data exchange and saving hundreds of hours of manual effort

Sep 2023 — Present

Corp Developer, Carrefour
madrid

- Optimized the application's performance by implementing caching and using memory-efficient data structures
- Refactored existing code to improve readability and maintainability, resulting in a X% reduction in development time
- Optimized code to reduce system resource usage by 25%
- Created an automated system for tracking customer data that reduced manual data entry by 33%

EDUCATION

Sep 2020 — May 2023

Web & Multiplatform Apps Development, IES Clara del Rey
Madrid

Cousing a Double Hight Technician degree, the student learns to create both Web and multiplatform applications for PC or mobile.

The main languages taught are Java for Back-End, implementing Spring Framework & Mobile development, and Angular & JS ES6 as tools for Front-End use.

A/G: DAM 8.35, DAW 8.15

| Jul 2018 — Jul 2020 | Microcomputer System Administration and Networking, IES Hipatia Fuhem | | Madrid |
